SUSTAINABLE DEVELOPMENT OF SMALL RURAL COMMUNITIES IN MARGINAL AREAS

BIODIVERSITY-PARMA: A NEW APPROACH TO SUSTAINABLE PRACTICES IN ANIMAL PRODUCTION

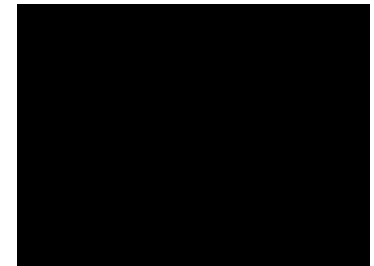

The main objective of the experience is to enhance the local animal populations, creating a virtuous chain that starts from farmers, through processors, and comes to the final consumers. The beneficiaries are represented by rural populations of disadvantaged areas in terms of economic environment in the province of Parma extended to other geographical areas. The breeding of local breeds in the province of Parma involving about 50 farmers, 3 slaughterhouses, 2 processing plants, restaurants, and / or farmhouse

BIODIVERSITY-PARMA: A NEW APPROACH TO SUSTAINABLE
PRACTICES IN ANIMAL PRODUCTION

Obiettivo principale dell'esperienza è quello di valorizzare le popolazioni animali locali, creando una filiera virtuosa che parte dagli allevatori, passa attraverso i trasformatori ed arriva ai consumatori finali. I beneficiari sono rappresentati dalle popolazioni rurali di aree svantaggiate dal punto di vista economico-ambientale della provincia di Parma estesa ad altre aree geografiche. L'allevamento delle razze locali coinvolge nella provincia di Parma circa 50 allevatori, 3 stabilimenti di macellazione, 2 stabilimenti di lavorazione, numerosi ristoranti e/o agriturismi della zona .
